

Application Rates for BioFlora Dry Crumbles®

Agricultural Applications:

Row Crops – At pre-planting or bedding up, broadcast 500 to 1,000 pounds per acre; Sidedress 200 pounds per acre in the bed as indicated by tissue analyses.

Trees – Apply 1 cup of granules for each one-inch diameter of a tree trunk. Work into soil under the drip line of trees. Apply every three months if possible.

Turfgrasses and Sports Fields:

Apply with a spreader at a rate of 500 pounds per acre, twice per year.

Landscaping and Gardens:

Apply 6 to 15 pounds of granules per 1,000 square feet of growing area, twice per year.

It is recommended that BioFlora Dry Crumbles® work best when applied in conjunction with the BioFlora® product Humega® as a soil additive. This organic acid is used to promote beneficial soil micro-organism activity and help buffer soil salts and other possible chemical contaminants.

Global Organics® is the leading provider of biological nutrients to the agricultural industry, differentiated by a commitment to creating sustainable and fertile soils with enhanced plant bioactivity and development.

Through its leading agricultural division, BioFlora®, we offer an unprecedented wealth of industry knowledge, innovative processes and solutions, as well as customized products and services to all of our clients.

Driven by the Integrated Life Science Research Center, an affiliate company composed of biologists, agronomists, molecular scientists, biochemists and technicians with laboratory and field experience, product development and field research are constantly evolving. This continuous scientific exploration has yielded new and exciting products in addition to worldwide ground breaking research.

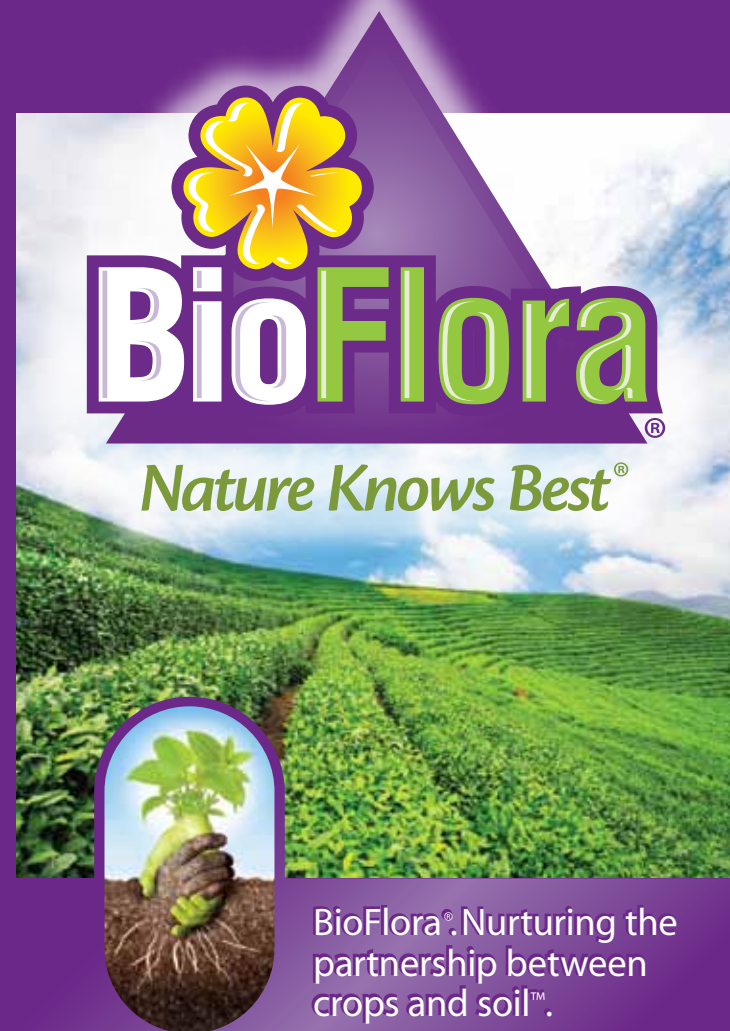

With a combined 40 years of expertise, supported with proprietary and patented technology, we are able safely innovate sustainable, environmentally friendly, agriculturally profitable, high quality products to better nurture the partnership between crops and soil.

Dry Crumbles®

Granular Plant Nutrients for Agriculture and Turf

BioFlora®. Nurturing the partnership between crops and soil™.

BioFlora Dry Crumbles®

BioFlora Dry Crumbles® are a variety of granular fertilizers formulated to provide an excellent source of high quality organic nutrients for all types of plants, ranging from row crops, berries, vineyards to turf and landscaping to fruit and nut trees.

These products have been developed to be a balanced blend of not only N-P-K nutrients, but to also contain high levels of calcium with other minor and trace minerals.

BioFlora Dry Crumbles® are designed for both pre-planting or continued fertilization throughout a growing season. These products are manufactured from high quality organic materials including feather meal, aquatic plant meal, organic acids and composted poultry litter.

Coarse Grade
for Agriculture

Fine Grade for
Turf and Landscape

Four Different Formulas

BioFlora® has four main formulas of crumbles for several different markets. Two formulas are for agriculture, which are OMRI Listed and can be used by Certified Organic or sustainable growers. The other two formulas are nutrient enhanced for turf and landscaping markets.

All are slow-release, carbon-based granules, feeding plants and the soil microbial ecosystem that supports them. BioFlora Dry Crumbles® may realize as much as three times their nutrient value when compared to conventional synthetic chemical fertilizers.

Certified Organic Use: BioFlora Dry Crumbles® are screened for the pathogens EHEC, E.coli 0157:H7, Salmonella, fecal and total coliforms and Listeria by a certified third-party laboratory.

Transplants treated with BioFlora Dry Crumbles® and Humega®

Benefits of Using BioFlora Dry Crumbles®

- Granular formulas that are a complete plant food with high carbon and nutrients
- Slow-release formulas that prevent leaching and nutrient loss
- High calcium that is readily available to plants and trees

- OMRI Listed for Certified Organic growers in the U.S. and international markets
- Easily spread with minimal dust
- Third-party pathogen screening
- Nutrients easily utilized by the crops and soil micro-organisms

BioFlora Dry Crumbles® Product List

BioFlora Dry Crumbles® (6-6-5 + 8% Ca):

This is thought by many growers to be the finest organic fertilizer available anywhere in the world. It is OMRI Listed for Certified Organic growers and ideal for any agricultural application, including row crops, vineyards and trees.
